

STI / HIV counseling

On these pages we inform you about the counseling services offered by the Health Department of the city of Mannheim. A multi-professional team offers information and counseling on sexually transmitted infections.

The counseling is anonymous and free of charge.

We offer:

- **Counseling on sexually transmitted infections (STIs)**, such as HIV, gonorrhea, infections with chlamydia, syphilis, hepatitis or the Human Papilloma Virus (HPV).
- **Anonymous and free HIV testing** with personal counseling. An HIV test is recommended 6 weeks after the risk contact at the earliest. The result is usually available after one week. An [Online appointment](#) for consultation and testing is necessary.
- **Free testings for hepatitis B and C and syphilis.**
- **Free testings for chlamydia and gonococci.**
- Support in finding medical and psychological help for affected persons
- Support in finding contact addresses in your city region

Important information for testing:

- Please check if you have been vaccinated against hepatitis A and B.
- Men should not have urinated for at least two hours before the urine collection.
- You do not need to be fasting for blood collection.
